Note from the NCVD manager's desk

Another year gone by and 2009 marks the beginning of the 4th year for NCVD. Big thanks to all for continuous encouragement and support for NCVD. For this year, NCVD plans to strive for better management and quality of data. Let's work together hand in hand to achieve this target.

The year 2008 has wrapped up and NCVD grows into its third year for ACS Registry and second year for PCI Registry. As a comparison with the previous years, decreasing number of cases was reported in 2008 for all sites. IJN has verified that their cases has dropped due to the decline in number of ACS patients admission in the year 2008. On the other hand, most of other sites are due to under reporting. Thus, the committee has decided to ask for feedback from all SDPs to identify the problems from each site. In addition, hospitals with CRC network are advised to consolidate the local resources such as internet broadband and share RA with other registries.

In 2009, once again, we will be having the NCVD Annual Meeting during the NHAM '09. For this year, we are expecting each SDP to present on their site's progress and to become more interactive. This will be a good opportunity to share your experiences with others and provide room for improvement. Centre Survey Study is also the highlight for the year 2009. The Centre Survey Study targets all cardiac centres nationwide. The next focus of NCVD is to encourage publication. Thus, graciously, we are calling for anyone who is interested in publishing papers based on NCVD data.

Best wishes to all for another year filled with joy and success. Goodbye 2008 and hello 2009!

HAPPY NEW YEAR!
