Cataract Logbook records all cataract surgeries that you have performed in any CSR participating hospital throughout the country

It is in real-time. Example: data for cataract surgery that you performed one hour ago will immediately appear in your logbook if you download it now

Data can be filtered! Example: You can filter and calculate the number of cases you performed which are complicated with PCR. You can find out what their visual outcomes are

As this auto cataract logbook is in the cloud, you can download it anytime and anywhere

How to filter data in the logbook?

Highlight variable row

PCR filter is on, select TRUE

The screenshot shows the Microsoft Excel interface with the 'Data' tab selected. The 'Filter' button is highlighted in the ribbon. A blue arrow points to the filter dropdown menu for the 'PCR' column, which is open. The 'Text Filters' option is selected, and the 'True' checkbox is checked. The data table below shows columns for Date of Operation, CSR ID, MyKad/MyKid #, Operated Eye, Surgery Type, No Intra-Op Complications, PCR, Vitreous Loss, C. Corneal Oedema, Zonular Dehiscence, and Drop.

#	Date of Operati	CSR ID	MyKad/MyKid #	Operated E	Surgery Ty	No Intra-Op Complications	PCR	Vitreous Loss	C. Corneal Oedema	Zonular Dehiscence	Drop

Why I cannot generate my CUSUM chart and download my cataract logbook?

Data for CSR are entered late or not entered at all. There are no data to chart!

Name of surgeon is not available in the drop down list in the Operative Form. So whoever enters data might have entered incomplete or wrong surgeon's name!

Surgeon is transferred to a new hospital but forgot to register his/her name to CSR in the new hospital!

**OH NO!
I FORGOT ...
SOMETHING ...
... BUT WHAT ?**

- Why don't we restart by
 - Ensuring all cataract cases that you have performed are reported to CSR
 - Ensuring your name is available in the drop down list in the Web Operative Form

This is CSR Operative Form

Google+ x NED x National Eye Database (NI x) Mohamad Aziz
