

# NTrD E-NEWSLETTER

## A Message Note From Principle Investigator

On behalf of the National Trauma Database (NTrD) allow me to extend to you and your families our warmest New Year's Greetings, wish you happiness and good health in 2011.

This is the fifth year of NTrD establishment as patient registry. Although there were a lot of challenges throughout the years of study, however, with the cooperation and hard work of the team, this registry succeeded with flying colors. To date, three reports have been published, two posters exhibited in scientific conference and an article was published. Of course, there will be more publications coming soon.

The registry is growing gradually. Initially, only five participating centres have joined NTrD. The number of centres has increased to eight in 2008 and by 2010, the number of centres continues to increase to thirteen. I hope more and more hospitals including universities and private hospitals will join us soon. Currently, there are over 29,000 cases registered in the database.

Last but not least, I would like to take this opportunity to express my highest gratitude to all the team members for your support, dedication and continuous efforts on this registry. I wish all of you Happy New Year 2011.

Best Wishes,  
Dr. Sabariah Faizah Jamaluddin  
Principal Investigator

- ✓ NTrD 2009 Report
- ✓ Collaboration Between NTrD and Monash University on Paper writing
- ✓ Formation of a governance board
- ✓ Poster presentation in Asian Conference For Emergency Medicine 2011 (pending for acceptance)
